#### Question: Is there any correlation with Age and Income

Based on the data, there is no correlation between age and income where ages less than 43 make mostly 150k as well as ages greater than 42. The charts below shows the distribution of ages where most ages reside between 25 and 50. I categorize the ages to allow an even count of ages on both side to allow for more better representation of the data resulting in an unbiased results.

2021 Income Range based on Age			
Count of Income			
	Less Than 43	Greater than 42	Grand Total
Less than \$5,000	510	266	776
\$5,000 - \$7,499	307	157	464
\$7,500 - \$9,999	279	209	488
\$10,000 - \$12,499	446	330	776
\$12,500 - \$14,999	385	257	642
\$15,000 - \$19,999	822	607	1429
